Hello,

Thanks for your help, I am now a graduate student in transportation program at Northwestern University, and recently I am writing a paper about the safety problems about Metra in past years. Unfortunately, there are some data that I couldn't find online and anywhere in your published reports so I need your help. I want to know if you could give me data about your compensations for casualties in derailment, collision incidents and incidents caused by human errors each year from 2000 to 2015. I only need the total number of compensation for each year so that I think Metra's privacy will not get violated. I will very appreciate it if you could send me back about these data. Thanks a lot!

Regards,
Siyi
