Good Morning,

I am conducting a HUD Noise Survey for a property located near Metra's Western Avenue station on the North Central Service line and I was wondering if you could provide me with some information about the trains that go through that station? Could you provide the average train speed, how many engines per train, is the engine electric or diesel, how many cars there are per train and if the train uses any kind of horns or whistles? Any information that you can provide will be greatly appreciated!

I look forward to hearing back from you and have a good day,

Samantha Holcombe – Environmental Intern
