

What is Ridership Analysis?

- Evaluation to project the potential number of riders and station boarding locations
- Simulation models that replicate individuals' travel patterns
- Examining 2, 4 or 6 round trip trains per weekday from Kendall County to Chicago
- Coordination with stakeholders and public to help inform decisions

What are the Outcomes?

- How/where to invest in transit
- Provides input on termini
- Station boarding and alighting estimates
- Potential impacts to existing service
- Provides cost/benefit data

Complete a general survey today by visiting our survey station or take the survey online at [Metrarail.com/kendallextension](https://metrarail.com/kendallextension). Surveys must be complete by January 6, 2020.
