f - Flag Stop - Stops to discharge passengers on notice to conductor and to pick up passengers on station platform visible to engineers

THERE ARE NO PROPOSED MAJOR CHANGES TO THE SATURDAY OR SUNDAY SCHEDULES

ATTENTION ROCK ISLAND LINE CUSTOMERS

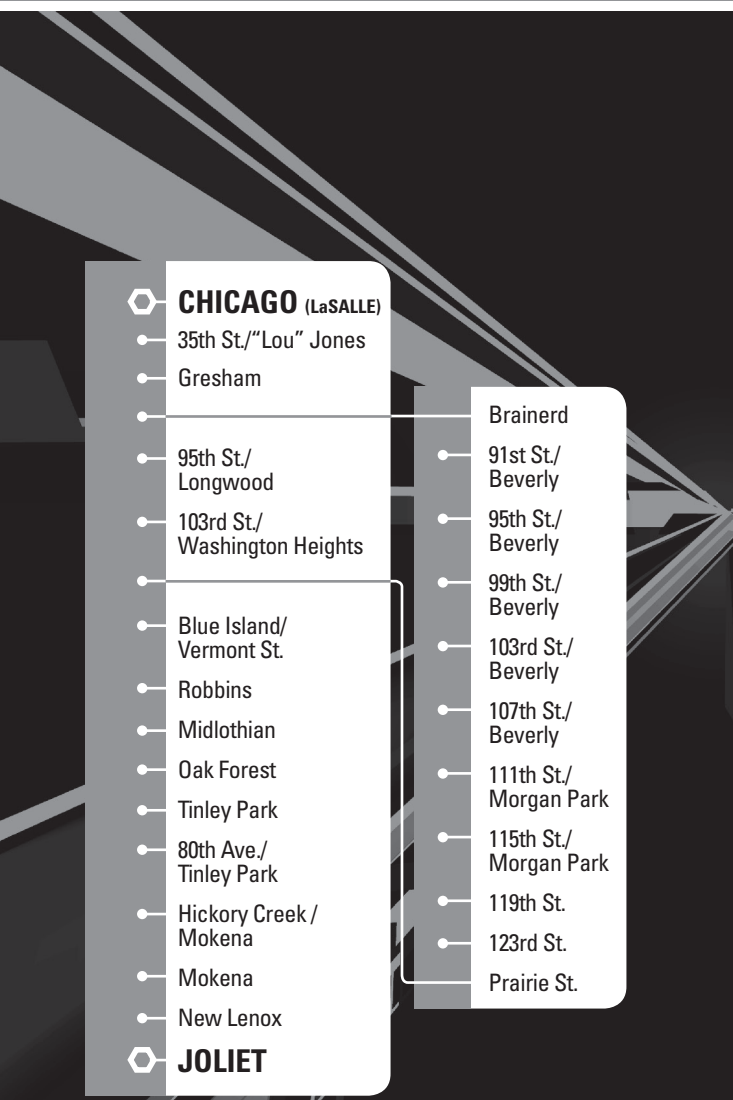

Due to the upcoming implementation of the Positive Train Control (PTC) safety system, Metra must make adjustments to the Rock Island Line schedule. PTC is a federally mandated safety system that will automatically stop a train if the engineer fails to obey a signal or exceeds the speed limit. PTC increases safety by preventing train-to-train collisions, unauthorized entry into work zones and derailments due to speeding or moving through misaligned track switches.

When PTC is fully implemented, it will affect how quickly trains will be able to turn around. To handle as many passengers as it does during the morning rush period, Metra must quickly turn trains around at downtown stations and send them back out to make more inbound trips. The same applies to the evening rush period, as trains complete their trips to the suburbs and turn back to pick up more customers downtown. Metra calls this process "flipping" a train, and it will take longer because of PTC.

This proposed schedule takes into account the longer "flip" times, while also adding service enhancements such as new express trains. Details about these proposed changes can be found at metrarail.com.

Please review how this schedule would affect your trips and visit www.metrarail.com/RockSchedule to let us know. Metra may revise the proposal based on feedback.

Attention Rock Island Line Customers Proposed Schedule Change

f - Flag Stop - Stops to discharge passengers on notice to conductor and to pick up passengers on station platform visible to engineers

THERE ARE NO PROPOSED MAJOR CHANGES TO THE SATURDAY OR SUNDAY SCHEDULES

ATTENTION ROCK ISLAND LINE CUSTOMERS

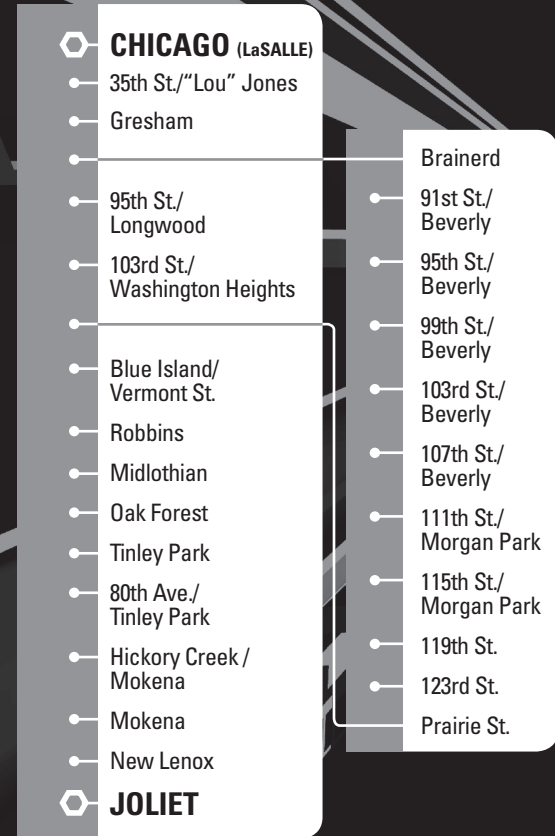

Due to the upcoming implementation of the Positive Train Control (PTC) safety system, Metra must make adjustments to the Rock Island Line schedule. PTC is a federally mandated safety system that will automatically stop a train if the engineer fails to obey a signal or exceeds the speed limit. PTC increases safety by preventing train-to-train collisions, unauthorized entry into work zones and derailments due to speeding or moving through misaligned track switches.

When PTC is fully implemented, it will affect how quickly trains will be able to turn around. To handle as many passengers as it does during the morning rush period, Metra must quickly turn trains around at downtown stations and send them back out to make more inbound trips. The same applies to the evening rush period, as trains complete their trips to the suburbs and turn back to pick up more customers downtown. Metra calls this process "flipping" a train, and it will take longer because of PTC.

This proposed schedule takes into account the longer "flip" times, while also adding service enhancements such as new express trains. Details about these proposed changes can be found at metrarail.com.

Please review how this schedule would affect your trips and visit www.metrarail.com/RockSchedule to let us know. Metra may revise the proposal based on feedback.
