All Metra diesel trains have at least one fully accessible rail car. These cars are equipped with a wheelchair lift, an accessible seating area and scrolling LED signs that convey information for deaf/hard of hearing passengers. On Metra’s Electric District, all rail cars are accessible.

- Of Metra’s 240 plus stations, nearly 80% are fully or partially accessible. This represents 96% of all Metra’s system wide boardings.
- At all downtown terminals, there is audible departure and track location information to assist blind and visually impaired passengers. There is automatic audible stop calling on all trains and audible train arrival announcements at all outlying stations.
- Customers with mobility devices and service animals are welcome on all Metra lines. Metra station staff and on-board personnel are trained to provide helpful, courteous service to customers with disabilities.

**STATION DESIGNATIONS**

**Accessible stations** meet all standards related to full accessibility. This includes ramps, elevators, signage, restrooms and tactile edge on platforms.

**Partially Accessible Stations** meet most accessibility standards. Customers with mobility devices will be able to access platforms and board their trains at these stations.

**Non-Accessible Stations** are usually elevated and only have stairs to reach the platforms. They are not modified with elevators or ramps.
